

Product Change Notification

Product affected: Dual-in-line-switches series SMP 700, SMP 800
Change from PA66 to PA46

Effective date: May 2007

Details:

We are going to change the material of the actuator from PA66 resin to PA46 resin from May 2007 production onwards.

By using this new material the switches can resist to a peak temperature of 255°C in a reflow soldering process (two times).
