Effective date: from December 2010

### Details:

After several trials we have found that these models are unsuitable for potting of pcb if certain casting compounds are used.

Therefore, the feature "suitable for potting" was removed from the specification.

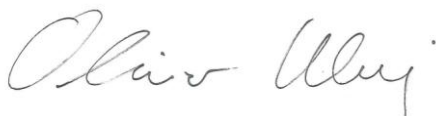

Models applicable to casting/potting are marked by the appendix –SL from now on.

Use only cold-curing compounds!

Example for ordering code: DBS 3108-SL

Any other technical data or specification is not affected by this.
