Product Change Notification

Affected products: MFS 231 P
MFS 231 P. [MFS 231 P dot]
MFS 231 P-POM

Effective date: immediately

Details:

Due to unavailability of components we are forced to discontinue the original MFS 231 P slide switch.

For replacement we introduced a switch made in another factory site.

At the same time an enhanced product becomes available which is able to withstand higher pre-heating temperature. This is achieved by use of PA instead of POM for the slider.

Accordingly the following model numbers exist:

The original MFS 231 P (already sold out), assigned model number: MFS 231 P. [MFS 231 P dot]

The corresponding part from the new site, MFS 231 P-POM

The improved product (MOQ is 10k pcs, start of production is May 2015), MFS 231 P

knitter-switch, April 2015
